COVI**FIND**™

CoviFind Covid-19 Antigen Self test enables early detection of the SARS CoV-2 virus. It helps verify infection quickly, begin proper treatment and initiate isolation precautions helping prevent further spread of infection.

CoviFind COVID-19 Antigen Self-Test is an In-Vitro diagnostics immunochromatographic rapid assay kit for the qualitative detection of SARS-CoV-2 specific antigen in nasal swab specimens from symptomatic & asymptomatic individuals. This test is authorised & intended for non-prescription home use as self-test with the self-collected nasal specimens from individuals aged 18 years or older & with adult collected nasal specimens from individuals aged 2 years or older. This test intended to be used as an aid in the diagnosis of SARS-CoV-2 infections. A positive test result should be considered as a true positive & does not need reconfirmation by RT-PCR test. Negative results must be combined with clinical observations, patient history, and epidemiological information. Symptomatic individuals identified negative by Rapid Antigen Test (RAT) should be linked with RT-PCR test facility and subsequently get tested by RT-PCR to rule out COVID-19 infection. In the meantime, such individual will be urged to follow home isolation and treatment as a negative report on RAT may not be true negative in some cases.

Advantages & Benefits

Easy

Self Test from the comfort of your home/ Point of care solution

Fast

Get results within 15 mins

2+

For All

Suitable for everyone Aged 2 & above

Safe

Less invasive and User Friendly Nasal swab (2-4 CM)

Accurate

AI Powered results delivered through the CoviFind App

Guided Testing

A simple step by step video guide on the CoviFind App to better user experience

Why CoviFind Rapid Antigen Test?

CoviFind COVID-19 Antigen Self Test offer multiple operational benefits in comparison to other confirmatory tests for detection of SARS-CoV-2.

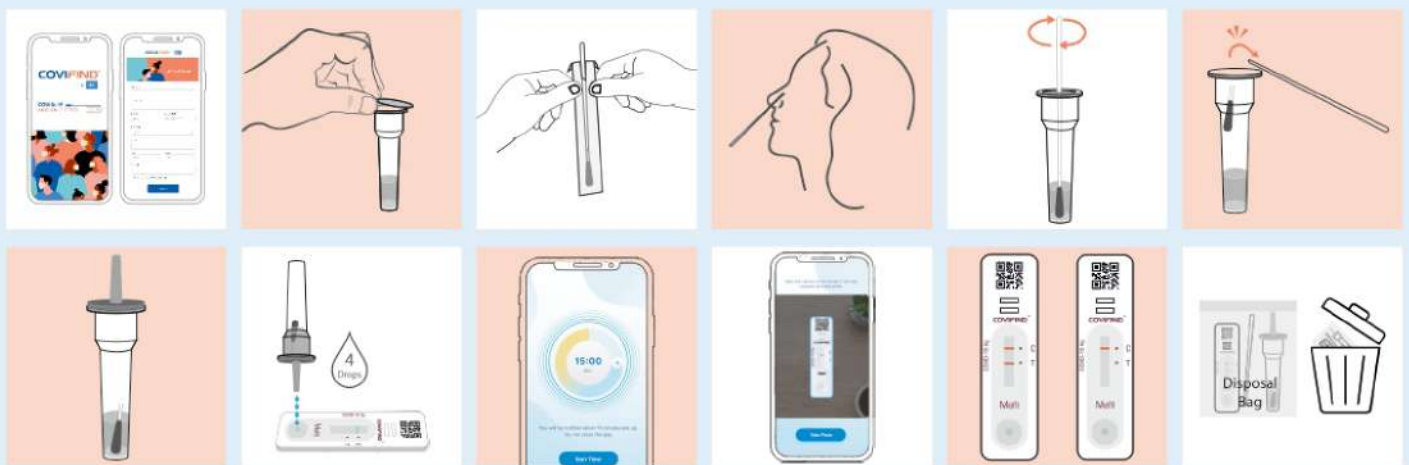

Timely and accurate COVID-19 self testing is an essential part of surveillance, contact tracing, infection prevention and control, and clinical management of COVID-19.

Due to the timeliness of results, CoviFind COVID-19 Self Test can provide added value e.g. in the patient triage process at home or in healthcare settings at admission.

CoviFind COVID-19 Antigen Self Test offer low-cost testing and relatively simple handling and in the context of contact tracing, rapid antigen tests can allow for a faster identification of infectious contacts.
